

Don't play with skin cancer, add sun protection to your game

We are a Sun Protection Accredited tournament/fixture having pledged to:

1. Appoint a sun pro ambassador
2. Add a sun protection statement
3. Display posters and share resources
4. Ensure sunscreen is available
5. Promote involvement on website/ socials

Brought to you by:

melanoma
fund

Sun Protection Tips...

- 1** Slip sunscreen (SPF30+), sunglasses, a hat and large umbrella in your kit bag (and use them!)
- 2** Slap on sunscreen 20 minutes before teeing off or starting work outdoors
- 3** Re-apply every two hours or more often if you are prone to sweating
- 4** Avoid a greasy grip by using an applicator or keep a small, damp towel handy

Those who play or work in golf are at high risk of melanoma and other forms of skin cancer due to **four main factors**:

When:

A round can lead to prolonged sun exposure when UV levels are strongest

Where:

Courses provide little shade, and highly UV reflective surfaces

How:

Golfers tend to avoid reapplying sunscreen to avoid a 'greasy grip'

Why:

Skin cancer is an epidemic and commonly affects golfers and greenkeepers
